MERT & STRÄTLING PROCESS MANAGEMENT GMBH

## Job Posting

### Senior Software Developer – SAP ABAP

*„Designs for the Metals Industry – concepts for the future.“*

Set new benchmarks with us!

Are you an experienced ABAP developer who wants to do more than just coding? Are you eager to shape solutions in a highly specialized team, delivering challenging digital transformation projects and redefining industry standards? Then we're looking for you!

**Location:** Saarbrücken / remote

**Contract Type:** Permanent Employment (Full-time or Part-time)

#### Your Responsibilities:

- Develop state-of-the-art SAP solutions in the field of Supply Chain Management, focusing on Production Execution and System Integration
- Take responsibility for the entire software development process – from requirements analysis to concept creation, implementation, and continuous improvement
- Set new standards for modern software architectures and promote the adoption of advanced technologies like SAP BTP, S/4HANA, Cloud, and On-Premise
- Develop and further establish the Software Development Group, advancing both its technical and professional capabilities

#### Your Background:

- Several years of experience in ABAP OO development, ideally in complex projects
- Expertise in modern technologies and concepts such as SAP BTP / BAS, S/4HANA, OData services, CDS views, and RAP
- Ideally, experience with Supply Chain processes in the metals industry and modules such as SAP SD or SAP PP
- You are familiar with the capabilities of the SAP Cloud Platform and want to design software solutions using new technologies
- Proficiency in either German or English
- A completed academic degree, ideally in Computer Science, Business Informatics, or a related discipline

---

**What we offer:**

- Unique projects: Work on solutions that set benchmarks for the industry
- High degree of autonomy: We trust you and value your freedom to make decisions
- Attractive conditions: Permanent contract, flexible working hours, company benefits, and a stable project environment
- Hybrid working model: combining remote work with regular team meetings and engaging team events
- Innovative work environment: Collaborate with experienced process and system architects with access to an extensive professional network
- Development opportunities: Grow both professionally and personally within a highly qualified and specialized team

**About us:**

We are a specialized consulting company with over 20 years of experience in the metals industry. Our expertise lies in Integrated Business Process Management and the development of innovative software solutions. With deep expertise in SAP and MES processes and solutions, we support our clients through every phase of their transformation projects.

Our goal: To effectively integrate processes, systems, and people while setting new standards.

**Are you ready to shape the future with us?**
